## INTRODUCTION

---

The Revin Team would like to thank you for choosing our handlebars to help you take your bike performance and riding experience to the next level. We know you have many handlebars to choose from and we appreciate the fact that you chose Revin to come along for your next adventure. Now get out there and Escape Ordinary. Please read through this owner's manual first, though.

## **BICYCLING DISCLAIMER AND INTENDED USE**

---

Bicycling is an inherently dangerous activity that may result in serious injury, property damage, or death. Revin, our affiliates, and our retail partners are not responsible for any injury, damage to property, or harm that may result from participating in the great sport of bicycle riding. We encourage all cyclists to know their own limitations and ride their bicycle in a safe and responsible manner.

### **INTENDED USE**

Revin recommends using our handlebars on mountain bike trails that are approved for bicycle use in accordance with local laws and regulations. Revin components are not to be used on a motorized vehicle. Mountain biking is an inherently dangerous activity and you should educate yourself as to your own skillset and the skills necessary to safely ride your mountain bike before operating. Any use that is outside of legal trail use or conducted without proper safety precautions will void all warranties and may increase the risk of serious injury, property damage, or death. Please be careful.

# INSTALLATION OF YOUR REVIN HANDLEBARS

---

Revin strongly recommends having your handlebars installed by a trained mechanic. Improper installation of your handlebar can lead to serious injury, property damage, or death. Revin is not responsible for any injury, damage, or death occurring from improper installation or use of our products. We want you to have fun and be safe so please take every precaution by having your handlebar installed by a trained mechanic.

## **IF YOU CHOOSE TO INSTALL YOUR REVIN HANDLEBARS BY YOURSELF PLEASE ENSURE THE FOLLOWING:**

1. Be sure your stem clamp diameter matches your new Revin handlebar (31.8mm or 35mm). Inspect the stem body and face plate are clear of burrs and chips. Clean up chips and burrs using sand paper prior to installing handlebar.
2. Apply carbon assembly paste to handlebar clamp area. Insert handlebar between the stem body and stem face plate. Use markings on front of handlebar to center handlebar. Adjust the angle of handlebar to desired position.
3. Tighten face plate to maximum torque specification to secure handlebar. Use caution and do not over-tighten the clamp or damage to handlebar will occur. Most torque ratings marked on stems are maximum amount before bolt failure, and is NOT an indication of proper torque for the handlebar. Tightening to maximum torque for stem bolts may damage handlebar and cause bar failure resulting in accident causing serious injury or death.

Note: For Four Bolt stem clamps, tighten the stem face plate fixing bolts in a diagonal pattern 1/4 to 1/2 turn at a time. For two-bolt stem clamps, alternate between bolts 1/4 to 1/2 turn at a time. Using this method will tighten bolts evenly and reduce chance of damage to bar or stem.

## INSTALLATION CONT.

---

4. Install brake levers, shifters and grips being careful to follow each individual parts manufacturer minimum torque specification.
5. Test ride bike and adjust.
6. Go Ride!

Riding with damaged handlebars may cause accident resulting in serious injury or death.

## MAINTENANCE

---

### **INSPECT YOUR BIKE PRIOR TO EACH RIDE**

Maintenance and repair work should always be performed by a competent and trained bicycle mechanic. Prior to each use, Revin recommends inspecting your bike and its components for damage or excessive wear. You should also ensure that all components are working properly prior to each ride.

### **MAINTAIN YOUR BIKE**

Revin components require periodic maintenance to keep your components in proper working order and to ensure the safety of your bicycle. Each individual is different and Revin strongly encourages consulting with a trained bicycle mechanic to develop a maintenance and inspection schedule that fits your individual needs.

## REVIN LIMITED LIFETIME WARRANTY AND CRASH REPLACEMENT

---

The team here at Revin is a passionate bunch and we want to get cyclists of all backgrounds stoked on our components. We realize premium cycling products are an investment and we want to help our customers feel secure in buying Revin components. We have a rigorous testing and quality control plan, but in the event that there is a failure we offer a lifetime warranty against manufacturer defects as well as a generous crash replacement policy.

What does “manufacturer defects” mean? It means, if your handlebars fail because of a flaw in the way the it was manufactured we will replace the damaged parts at no cost to you. We will want to take a look at the effected handlebar. Revin will generate a call tag and ask you to carefully package the handlebar and use the call tag to ship the wheel back to Revin. We will then inspect the handlebar so that we can determine the cause of the failure.

If you break your handlbar and it is determined that it was not a manufacturer defect, we want to make sure that your investment is protected so we offer a generous crash replacement program. Revin will offer replacement parts and labor at a steep discount off of their respective retail prices. The Revin crash replacement policy is also available for as long as you, the original purchaser, owns the handlebars. We want you to ride often, have fun and not have to worry about your handlebars. Hopefully you don't ever have a breakdown, but in the rare event that happens we'll find a way to get you back out pedaling.
